DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-36 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al., EP 1 125 928 A1 (hereinafter "Watanbe"). Watanabe teaches a transition metal compound and

catalyst for the production of polyolefins. See Watanabe, Abstract; pages 3-6. Furthermore, Watanabe expressly states R⁶⁻¹⁵ of formula I may be bonded to each other to form a ring. See Watanabe, page 4, lines 23-24.

4. The basic requirements of prima facie case of obvious are: (1) there must be some suggestion or motivation, either in the reference themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings; (2) there must be a reasonable expectation of success; (3) the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP 2143. The Examiner contends there is suggestion or motivation to incorporate the teaching that R⁶⁻¹⁵ of formula I may be bonded to each other to form a ring. "There are three possible sources for a motivation to combine references: the nature of the problem to be solved, the teachings of the prior art, and the knowledge of persons of ordinary skill in the art." See In re Rouffet, 149 F.3d 1350, 1357, 47 USPQ2d 1453, 1457-58 (Fed. Cir. 1998). Although Watanabe does not disclose in the working examples the incorporation of the teaching that R⁶⁻¹⁵ of formula I may be bonded to each other to form a ring, based on the specification

as a whole a polymer chemist of ordinary skill in the art would be motivated to modify Watanbe by preparing catalyst of the present invention. Such modification would be obvious because one would have a reasonable expectation of success that complexes and process for preparing the complexes as taught by Watanbe would be similarly useful and applicable to use in preparing ethylene polymers. Therefore, claims 1-36 are deemed as being unpatentable over Watanbe.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

6. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
